HOW TO USE THE DIRECTORY

The Q-Link Public Domain Software Directory makes downloading quicker and easier by allowing you to browse through the libraries offline.

This Directory is the 1988 update and includes all public domain files in the Q-Link "Software Libraries" found in the COMMODORE SOFTWARE SHOWCASE and the COMMODORE INFORMATION NETWORK.

We have also included in this Directory all of the files in the GEOS, New Product Information, Special Edition Software and Commodore Educational Software libraries.

Information on each file includes its subject heading (in bold), the filename, the name of the person who uploaded the file, and the date the file was uploaded. Each chapter corresponds to a different Q-Link library. The chapter is then broken down into the same categories as the online libraries. The files are listed under each category in alphabetical order by subject heading.

For example, if you are looking for an arcade game for your C-128, check the Table of Contents for **C-128 Software** and then find the chapter titled **Game Room**. Under that chapter, you will find a category called **Arcade**. Under Arcade, you will find additional subdivisions such as **Shoot 'em Up** and **Strategy**. If you go to the page number listed next to Strategy, for example, you will find all of the Strategy game files in alphabetical order. Scan down through the page until you find a subject heading that interests you.

When you find a file you want to download, sign on to Q-Link, go to "**Software Libraries**" in the COMMODORE SOFTWARE SHOWCASE or COMMODORE INFORMATION NETWORK and select "**Download a Specific File.**" You will be able to read some basic information about the file (download time, other files needed, etc.) and then download the file directly. For more on downloading, see page 3.

If you want the complete description on a file listed in the Directory, go to the "**Software Libraries**" on Q-Link, select "**Browse C64 Software**" (or 128 or Amiga) and the appropriate library and category. Next, select "**List by Filename.**" You will see a menu with ranges of dates. The date on the file in the Directory will tell you which option on the "Date" menu to choose. When you find the filename on the menu, move the check mark next to it and press F1. The description for the file will appear.

HOW TO UPLOAD A FILE

If you have a software gem that you would like to share with other Q-Link members, you can upload it to the Q-Link Public Domain Software Library...FREE!

Here's how you do it:

After you are signed on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE or the COMMODORE INFORMATION NETWORK and select **"Software Libraries."** On the Software Libraries menu, select **"Upload a File."** You will then see the eight software libraries.

Decide in which library your program belongs. Next, choose the appropriate software category within the library.

On the next menu you see, select **"Submit a new file for this area."** Q-Link will ask you for the name of the file you wish to upload. This filename must be the exact name of the file on your floppy disk. Type in the filename and press RETURN.

You will then see a screen on which you can type in a description of the file you are uploading. Your description should state that the file is in the public domain and a meaningful explanation of the file, for example:

"THIS IS THE DOCUMENTATION FILE FOR... "

"THIS IS THE SECOND OF 4 FILES... "

"THIS IS A DISK UTILITY PROGRAM THAT GIVES YOU THE OPTION OF PRINTING TO THE SCREEN OR PRINTER...."

After you are finished typing the program description, press F7 and select **"Send your message to Q-Link."** At this point, make sure you have inserted the disk that contains the file you wish to upload. Q-Link will search your disk for the file and then begin uploading.

The file you upload **WILL NOT** appear in the Software Library immediately. It will be made available to the public by the SysOp of the particular library within a few days.

HOW TO DOWNLOAD A FILE

To download a file (transfer from our computer to yours), sign on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE or COMMODORE INFORMATION NEWTORK and select "**Software Libraries.**" Make sure you have a formatted disk handy. (See page 4 for information on formatting).

DOWNLOAD A SPECIFIC FILE

By using the Software Directory to locate files you are interested in, you can quickly download them from Q-Link.

When you find a file in the Directory that you want to download, select "**Download a Specific File**" from the Software Libraries menu and then select "Download A File." Q-Link will ask you to type in the FILENAME and press RETURN. Then type in the name of the UPLOADER and press RETURN.

Q-Link will check to make sure the file is available and then ask you to insert a formatted disk to receive the file. When you are ready, press RETURN and the file will be downloaded. A bell will ring on your Commodore telling you when the download is complete (version 3 disks only).

BROWSE THE LIBRARIES

If you don't have a specific title in mind, or if you want to find out more information about a file you have selected from the Directory, select "**Browse**" from the Software Libraries menu. You can "Browse" for C-64, C-128 or Amiga Software.

Choose the library you are interested in and then select the appropriate software category. You can then choose to see the files by FILENAME or by SUBJECT HEADING. The filename is the name that the uploader gave to the file. The subject heading more clearly defines what the software does.

Either choice will give you a menu of dates. The dates correspond to when files were uploaded. Move the checkmark to the date and press F1. You will then see a menu of filenames. To read about a file, move the checkmark to the filename and press F1. The description will be displayed on your screen.

If you wish to download the file, press F7. A menu will be displayed giving you the options to read or post comments about the program, get documentation on the program (if available), or download the program. To download the program, take out your Q-Link disk and insert a formatted disk. Then select "**Download This File.**" Q-Link will then automatically download the file.

HOW TO FORMAT DISKS

To save files on a new disk, the disk must be formatted. Here's how to format a disk:

1. Turn on your drive, monitor and computer. If you own a 128, hold down the Commodore key so you can boot up in 64 mode.
2. Place the blank disk you wish to format in the drive and close the drive door.
3. Type: OPEN15,8,15,"N0:diskname,id":CLOSE15
4. Press RETURN

The "diskname" is any name you wish to use up to 16 characters. The "id" is any two characters (the drive uses the "id" to identify the disk). An example of a diskname and id is "GAMES 1,G1."

You will "lose" the flashing cursor while the drive is formatting the disk, until it reaches and executes the CLOSE command. A flashing light on the drive unit means an error has occurred.

Remember that formatting a disk will erase all existing files on a disk and that you only need to format a disk the first time you use it.

After your disk is formatted, you will be able to download files from Q-Link.

SPECIAL PUBLIC DOMAIN FILES

Many filenames in the public domain libraries end with a period (.) followed by a suffix that denotes something special about the file. Usually, it means the file was created or modified by a "utility" program. Following is a brief explanation of some of the more common suffixes you'll find in the software libraries. All of the utility programs you will need to use these files are located in the **"Q-Link Utilities"** library located in **"Software Libraries"** in the COMMODORE SOFTWARE SHOWCASE and COMMODORE INFORMATION NETWORK.

- ".arc"** Files that end in ".arc" must be "broken up" using the "ARC" utility program. Files that end in ".arc" usually contain many files that have been combined and condensed into one file for quicker uploading and downloading.
- ".lbr"** Files that end in ".lbr" must also be "broken up" using one of the utilities called "LIBRARY". There are two "LIBRARY" utilities. Check the "Files Needed" field in the description of the file you want to download to find out which "LIBRARY" utility to use.
- ".lnx"** Files that end in ".lnx" are made up of more than one file that have been combined into one file. You will need to use the "LYNX" program to break this file up after it has been downloaded.
- ".sda"** This stands for "self-dissolving arc". Files that end in ".sda" are similar to ".arc" files except that you don't need a separate utility to break up (or dissolve) the files. When you run the program, the file will automatically dissolve into separate files on your disk.
- ".doc"** Files that end in ".doc" are documentation on how to use another program. These are usually "text files" and can be read using one of the "Text Readers" in the **"Q-Link Utilities"** library.
- ".seq"** Files that end in either ".seq" or ".txt" are files that can read using one
".txt" of the "Text Readers" in the **"Q-Link Utilities"** library.

For more information on these suffixes, visit the **"Q-Link Utilities"** library. You can also ask one of our many SysOps who will be happy to help you learn how to use these programs.

ABOUT THE LIBRARIES

All of the files under C-64, C-128 and Amiga in this Directory can be found in the "**Software Libraries**" area of COMMODORE SOFTWARE SHOWCASE and COMMODORE INFORMATION NETWORK (CIN).

Files in the GEOS libraries can be found in the "**GEOS Arena**" in the COMMODORE SOFTWARE SHOWCASE. To use these files, you must have a copy of the GEOS operating system and/or the particular application (e.g. geoWrite or geoPaint). New Product Information files contain catalogs, product descriptions and demonstration software. These files can be found in "**New Product Information**" in the "**Software Buying Guide**" in COMMODORE SOFTWARE SHOWCASE.

Special Edition Software are programs created by well-known Commodore programmers Jim Butterfield, Bob Baker, Louis F. Sander and Lou Wallace. These files are located in the "**Special Edition Software**" area of COMMODORE INFORMATION NETWORK.

Commodore Educational Software are education programs produced by Commodore and released to the public domain. These programs can be found in the LEARNING CENTER under "**Educational Software.**"

Q-Link also offers a number of public domain programs **NOT** listed in this Directory. The programs are located in the areas in **bold**. Here's how to find some of those programs:

HOW TO USE THE DIRECTORY

The Q-Link Public Domain Software Directory makes downloading quicker and easier by allowing you to browse through the libraries offline.

This Directory is the 1988 update and includes all public domain files in the Q-Link "Software Libraries" found in the COMMODORE SOFTWARE SHOWCASE and the COMMODORE INFORMATION NETWORK.

We have also included in this Directory all of the files in the GEOS, New Product Information, Special Edition Software and Commodore Educational Software libraries.

Information on each file includes its subject heading (in bold), the filename, the name of the person who uploaded the file, and the date the file was uploaded. Each chapter corresponds to a different Q-Link library. The chapter is then broken down into the same categories as the online libraries. The files are listed under each category in alphabetical order by subject heading.

For example, if you are looking for an arcade game for your C-128, check the Table of Contents for **C-128 Software** and then find the chapter titled **Game Room**. Under that chapter, you will find a category called **Arcade**. Under **Arcade**, you will find additional subdivisions such as **Shoot 'em Up and Strategy**. If you go to the page number listed next to **Strategy**, for example, you will find all of the **Strategy** game files in alphabetical order. Scan down through the page until you find a subject heading that interests you.

When you find a file you want to download, sign on to Q-Link, go to "Software Libraries" in the COMMODORE SOFTWARE SHOWCASE or COMMODORE INFORMATION NETWORK and select "Download a Specific File." You will be able to read some basic information about the file (download time, other files needed, etc.) and then download the file directly. For more on downloading, see page 3.

If you want the complete description on a file listed in the Directory, go to the "Software Libraries" on Q-Link, select "Browse C64 Software" (or 128 or Amiga) and the appropriate library and category. Next, select "List by Filename." You will see a menu with ranges of dates. The date on the file in the Directory will tell you which option on the "Date" menu to choose. When you find the filename on the menu, move the check mark next to it and press F1. The description for the file will appear.

HOW TO UPLOAD A FILE

If you have a software gem that you would like to share with other Q-Link members, you can upload it to the Q-Link Public Domain Software Library...FREE!

Here's how you do it:

After you are signed on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE or the COMMODORE INFORMATION NETWORK and select "Software Libraries." On the Software Libraries menu, select "Upload a File." You will then see the eight software libraries.

Decide in which library your program belongs. Next, choose the appropriate software category within the library.

On the next menu you see, select "Submit a new file for this area." Q-Link will ask you for the name of the file you wish to upload. This filename must be the exact name of the file on your floppy disk. Type in the filename and press RETURN.

You will then see a screen on which you can type in a description of the file you are uploading. Your description should state that the file is in the public domain and a meaningful explanation of the file, for example:

"THIS IS THE DOCUMENTATION FILE FOR..."

"THIS IS THE SECOND OF 4 FILES..."

"THIS IS A DISK UTILITY PROGRAM THAT GIVES YOU THE OPTION OF PRINTING TO THE SCREEN OR PRINTER...."

After you are finished typing the program description, press F7 and select "Send your message to Q-Link." At this point, make sure you have inserted the disk that contains the file you wish to upload. Q-Link will search your disk for the file and then begin uploading.

The file you upload WILL NOT appear in the Software Library immediately. It will be made available to the public by the SysOp of the particular library within a few days.

HOW TO DOWNLOAD A FILE

To download a file (transfer from our computer to yours), sign on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE or COMMODORE INFORMATION NETWORK and select "Software Libraries." Make sure you have a formatted disk handy. (See page 4 for information on formatting).

DOWNLOAD A SPECIFIC FILE

By using the Software Directory to locate files you are interested in, you can quickly download them from Q-Link.

When you find a file in the Directory that you want to download, select "Download a Specific File" from the Software Libraries menu and then select "Download A File." Q-Link will ask you to type in the FILENAME and press RETURN. Then type in the name of the UPLOADER and press RETURN.

Q-Link will check to make sure the file is available and then ask you to insert a formatted disk to receive the file. When you are ready, press RETURN and the file will be downloaded. A bell will ring on your Commodore telling you when the download is complete (version 3 disks only).

BROWSE THE LIBRARIES

If you don't have a specific title in mind, or if you want to find out more information about a file you have selected from the Directory, select "Browse" from the Software Libraries menu. You can "Browse" for C-64, C-128 or Amiga Software. Choose the library you are interested in and then select the appropriate software category. You can then choose to see the files by FILENAME or by SUBJECT HEADING. The filename is the name that the uploader gave to the file. The subject heading more clearly defines what the software does.

Either choice will give you a menu of dates. The dates correspond to when files were uploaded. Move the checkmark to the date and press F1. You will then see a menu of filenames. To read about a file, move the checkmark to the filename and press F1. The description will be displayed on your screen.

If you wish to download the file, press F7. A menu will be displayed giving you the options to read or post comments about the program, get documentation on the program (if available), or download the program. To download the program, take out your Q-Link disk and insert a formatted disk. Then select "Download This File." Q-Link will then automatically download the file.

HOW TO FORMAT DISKS

To save files on a new disk, the disk must be formatted. Here's how to format a disk:

1. Turn on your drive, monitor and computer. If you own a 128, hold down the Commodore key so you can boot up in 64 mode.

2. Place the blank disk you wish to format in the drive and close the drive door.

3. Type: OPEN15,8,15,"N0:diskname,id":CLOSE15

4. Press RETURN

The "diskname" is any name you wish to use up to 16 characters. The "id" is any two characters (the drive uses the "id" to identify the disk). An example of a diskname and id is "GAMES 1,G1."

You will "lose" the flashing cursor while the drive is formatting the disk, until it reaches and executes the CLOSE command. A flashing light on the drive unit means an error has occurred.

Remember that formatting a disk will erase all existing files on a disk and that you only need to format a disk the first time you use it.

After your disk is formatted, you will be able to download files from Q-Link.

SPECIAL PUBLIC DOMAIN FILES

Many filenames in the public domain libraries end with a period (.) followed by a suffix that denotes something special about the file. Usually, it means the file was created or modified by a "utility" program. Following is a brief explanation of some of the more common suffixes you'll find in the software libraries. All of the utility programs you will need to use these files are located in the "Q-Link Utilities" library located in "Software Libraries" in the COMMODORE SOFTWARE SHOWCASE and COMMODORE INFORMATION NETWORK.

".arc" Files that end in ".arc" must be "broken up" using the "ARC" utility program. Files that end in ".arc" usually contain many files that have been combined and condensed into one file for quicker uploading and downloading.

".lbr" Files that end in ".lbr" must also be "broken up" using one of the utilities called "LIBRARY". There are two "LIBRARY" utilities. Check the "Files Needed" field in the description of the file you want to download to find out which "LIBRARY" utility to use.

".lnx" Files that end in ".lnx" are made up of more than one file that have been combined into one file. You will need to use the "LYNX" program to break this file up after it has been downloaded.

".sda" This stands for "self-dissolving arc". Files that end in ".sda" are similar to ".arc" files except that you don't need a separate utility to break up (or dissolve) the files. When you run the program, the file will automatically dissolve into separate files on your disk.

".doc" Files that end in ".doc" are documentation on how to use another program. These are usually "text files" and can be read using one of the "Text Readers" in the "Q-Link Utilities" library.

".seq" Files that end in either ".seq" or ".txt" are files that can read using one of the "Text Readers" in the "Q-Link Utilities" library.

For more information on these suffixes, visit the "Q-Link Utilities" library. You can also ask one of our many SysOps who will be happy to help you learn how to use these programs.

ABOUT THE LIBRARIES

All of the files under C-64, C-128 and Amiga in this Directory can be found in the "Software Libraries" area of COMMODORE SOFTWARE SHOWCASE and COMMODORE INFORMATION NETWORK (CIN).

Files in the GEOS libraries can be found in the "GEOS Arena" in the COMMODORE SOFTWARE SHOWCASE. To use these files, you must have a copy of the GEOS operating system and/or the particular application (e.g. geoWrite or geoPaint). New Product Information files contain catalogs, product descriptions and demonstration software. These files can be found in "New Product Information" in the "Software Buying Guide" in COMMODORE SOFTWARE SHOWCASE.

Special Edition Software are programs created by well-known Commodore programmers Jim Butterfield, Bob Baker, Louis F. Sander and Lou Wallace. These files are located in the "Special Edition Software" area of COMMODORE INFORMATION NETWORK.

Commodore Educational Software are education programs produced by Commodore and released to the public domain. These programs can be found in the LEARNING CENTER under "Educational Software."

Q-Link also offers a number of public domain programs NOT listed in this Directory. The programs are located in the areas in **bold**. Here's how to find some of those programs:
